Warehouse Control System v8

## Mobile Truck; Module

### RF Data Collection Bolt-On Module for PickPro™ ICS

The *PickPro*™ Mobile Truck Module allows an operator to have a fully functional touch screen terminals mounted on a lift truck. We can implement bar code printers along with a long range scanner to accommodate any warehouse need.

Main Screen from Truck Module

With scan verification turned on, the operator is 99.99% accurate during the picking or receiving operations. Using a mobile portable terminal gives the fork truck operator the ability to have real time communication for all transaction.

Warehouse Control System v8

## Mobile Truck; Module

The WCS PC program is used to establish which orders are ready to be picked. The RF terminal is then used to efficiently direct the picker to the locations throughout the warehouse.

This module is designed specifically for use on VNA equipment or carts, such as turret trucks, order-pickers, or picking cart where full screen terminals can be mounted on the equipment and the operator travels with the equipment to the point of use for all warehouse operations.

The screens are designed to direct the operator using the display to point to the right side of a picking aisle. Other features that are supported with this module include:

- Directed Putaway
- Directed Moves
- Cycle Counts
- Hot Picks System

- Directed Hot Picks Operator Directed
- Hot Put-away Operator Directed
- Hot Put-away System Directed

Access to the Inventory Map and Inventory Master are also available

The screenshot displays the 'Mobile Pick' interface. At the top, there's a 'Location' field with the value '07A0117 22'. Below it, the 'Order Number' is 'Pick 8N8857726'. The 'Location Qty' is '800'. The 'Lot #' is '0'. There are fields for 'User1' and 'User2'. A 'Scan Verification' dialog box is overlaid, showing 'Item : 8N8857726A', 'Part 8N8857726A', 'Location Number 07A0117 22', 'Item Number 8N8857726A', and 'Lot Number 0'. A red arrow points to the 'Location Number' field with the text '0117 22'. Buttons for 'Scan Verify', 'Label Menu', 'Reprint Label', and 'Complete Action' are visible.
